

Bruest Catalytic Heaters PORTABLE HEATERS

Portable Heaters:

- Bruest portable heaters produce safe infrared radiant heat, to heat both human and equipment environments.
- Canadian Standards Association models are approved for use in Class I, Division 1 and 2, Group D locations.
- Ideal for providing temporary heat in compressor, instrument meter, and wellhead buildings.
- Bruest portable heaters are adjustable so the infrared heat can be directed to where it is needed.
- Built for Natural Gas, Liquid Propane, or butane. Alternate fuel requirements by special order.
- Sizes: 24,000 BTU/HR. input - 72,000 BTU/HR. input.
- Smaller size portable heaters are available for use with small propane bottles. Contact factory for information.

Model No.	BTU/HR. INPUT	Available Start-Up Voltage	Dimensions in Inches		
			Height	Width	Depth
PH20M	24,000	12, 120, 240	49"	31"	25"
